CONSISTENCY

ONE OF THE REASONS THAT
COLLAPSING MARGINS CREATE INCONSISTENCY
IS THAT TEXT ELEMENTS (AND SOME OTHER ELEMENTS) HAVE
DEFAULT MARGIN-TOP & MARGIN-BOTTOM

SOME PEOPLE LIKE RESET EVERYTHING

```css
* {
    box-sizing: border-box;
    margin: 0;
    padding: 0;
}
```

I PERSONALLY FIND THAT THIS IS
OVERKILL

I LIKE RESETING WHAT I NEED TO RESET

```css
h1,
h2,
h3,
h4,
p {
    margin: 0;
}
```

HOW YOU APPROACH THIS IS REALLY UP TO YOU

Sure, when we make a navigation with a `ul` we need to get rid of the defaults, and all pages have a nagivation.

To me though, it seems silly to have to bring the defaults back in when I have a regular list.

I LIKE RESETING WHAT I NEED TO RESET

```css
ul[class] {
  margin: 0;
  padding: 0;
  list-style; none;
}
```

WHEN WE REMOVE ALL OF OUR SPACING, THERE WILL BE TIMES WE NEED TO BRING IT BACK

USUALLY THIS IS WHEN WE WANT IT TO BEHAVE LIKE REGULAR FLOW CONTENT ONCE AGAIN.

THERE ARE TWO COMMON APPROACHES.

```css
.flow-content > * {
  margin-bottom: 1rem;
}

.flow-content > *:last-child {
  margin-bottom: 0;
}
```

```css
.flow-content > * + * {
  margin-top: 1rem;
}
```
